# CNIT 152: Incident Response

Fall 2019 Sam Bowne

CRN 78482 501 Thu 6:10 - 9 pm SCIE 200

Textbook

Incident Response & Computer Forensics, Third Edition by by Jason Luttgens, Matthew Pepe, and Kevin Mandia
Publisher: McGraw-Hill Education; 3 edition (August 1, 2014)
Sold by: Amazon Digital Services, LLC, ASIN: B00JFG7152

Catalog Description

When computer networks are breached, incident response (IR) is required to assess the damage, eject the attackers, and improve security measures so they cannot return. This class covers the IR tools and techniques required to defend modern corporate networks. This class is part of the Advanced Cybersecurity Certificate.

Quizzes

The quizzes are multiple-choice, online, and open-book. However, you may not ask other people to help you during the quizzes. You will need to study the textbook chapter before the lecture covering it, and take the quiz before that class. Each quiz is due 30 min. before class. Each quiz has 5 questions, you have ten minutes to take it, and you can make two attempts. If you take the quiz twice, the higher score counts.

To take quizzes, log in to Canvas here:
