

- Change password
 - Cli > set password
 - Gui > admin tab > change password
- Set admin access addresses
 - Setup > Management interface settings > add ip addresses
 - Public key login (disable password?)
 - Disable ssh admin access?
- Reset zones to block all traffic
 - Policies > create/deactivate policies
- Commit to make changes current
- Check to make sure no other user accounts
- Write firewall rules to allow proper traffic flow
- Check network intrusion monitoring (ACC risk factor?)
